Re: DOCKET 03-101-2

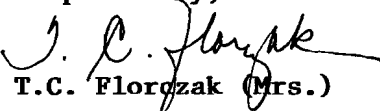

Dear APHIS:

Monsanto/Scotts seeks deregulation of genetically engineered creeping bent grass; with so many unknowns involved as well as the known reality of crops contamination, and so much of our natural environment already destroyed, we are on the brink of serious negative consequences. There needs to be years and years of studies before letting loose something that cannot be taken back.

Please: -no deregulation of g.e. creeping bent grass;
-impacts statements should be for ALL genetically engineered crops,
whether for food sources or otherwise.

Thank you for your planned environmental impact statement on creeping bent grass, and thank you for reading this and for your services of accountability for actions taken.

Respectfully,

T.C. Florozak (Mrs.)
